Education

P.E.S Institute of Technology and Management (PESITM)

Expected 2027

B.E. in Computer Science & Engineering (CSE), CGPA-8.9

Shivamogga, Karnataka

Shree Guru Independent PU College

2023

PUC (Science) — 93.33%

Kalaburagi, Karnataka

Mount Carmel Convent School

2021

SSLC — 89.28%

Shahabad, Karnataka

Technical Skills

Languages: C, C++, Java, Python, HTML, CSS, JavaScript, SQL, React.js

Frameworks / Libraries: MONAI, PyTorch, TensorFlow, NumPy, Pandas

Tools: VS Code, Cursor, Windsurf IDE, Jupyter Notebook, Git, MySQL Workbench

Skills: Deep Learning, Image Segmentation, DBMS, AI Automation, Model Training

Projects

3D Brain Tumor & 2D Retinal Vessel Segmentation | *MONAI, PyTorch*

Completed

- BraTS(Brain Tumor Segmentation) Developed a model for the BraTS (Brain Tumor Segmentation) challenge on Kaggle, focusing on analyzing multi-modal MRI data to identify and segment tumors. Developed the project by structuring the codebase, implementing the segmentation model, and systematically debugging errors to optimize its performance.

Check-in Check-out System (DBMS) | *MySQL, Java*

Completed

- Developed a dynamic Check-in/Check-out system with features for user registration, real-time entry/exit logging, and an administrative dashboard. Gained experience in server-side scripting with PHP, database management using XAMPP (MySQL), and building the user interface with HTML and CSS.

AI Legal Buddy | *Python, FastAPI, Mistral/Gemma*

Completed

- LLM-powered legal assistant enabling clause extraction, semantic contract analysis, and automated document review with offline LLM inference.

Examination Seat Allotment System | *React, Node.js, PostgreSQL*

Mini Project

- Built a web-based system to automate exam seat allocation for academic institutions. Features include CSV-based bulk data upload for students, rooms, and invigilators; pattern-based seating (alternate rows/columns, checkerboard); downloadable PDF/CSV reports; and a student portal for viewing assigned seats and exam halls.

Achievements

- Participated in MONAITHON Hackathon (Medical AI).
- Developed Examination Seat Allotment System as a mini-project under VTU curriculum.
- Created AI Legal Buddy using NLP and LLM models.
